

Fiberglass Screening for Windows and Doors

Designed for performance, Phifer offers a complete line of fiberglass screen products for windows and doors that emphasize the outward view, allow better airflow and ventilation and provide protection from pesky insects. True to Phifer's commitment to quality and craftsmanship, these screens are woven from permanent glass yarn – coated with a protective vinyl to ensure lasting beauty, color and flexibility – and will not rust corrode or stain.

PHIFER
ULTRAVUE

Excellent Visibility Insect Screen (eVis)

- Greater openness provides...
 - ...25% better airflow, allowing light and fresh breezes to flow through
 - ...25% more optical clarity for a crisper, brighter outward view
- Improves light transmittance in low-E glass windows, offering a brighter view
- Ideal for windows where the focus is on the view
- GREENGUARD certified

PHIFER
